TOPICS

Exploring the traditional food and wine production and local heritage: Present and future

DESCRIPTION

University of La Rioja (Spain) together with our EU-GIFT partners from University of Eszterházy (Hungary), University of Agricultural Sciences and Veterinary Medicine Cluj-Napoca (Romania), University of Tras-os-Montes and Alto Douro (Portugal) and University of Verona (Italy) is organizing a joint summer school, which will take place in Logroño (Spain) in June 2026.

The course will be focus on **traditional food and wine production and local heritage**. Traditional food and wine production is increasingly recognised as a powerful driver of cultural identity, local sustainability, rural development, tourism development, and community resilience. Many regions face a risk of losing traditional tastes and practices due to homogenised global food culture. This concern drives the renewed interest in analyse the opportunities and future of traditional products. Recent research shows a strong global move toward reconnecting with heritage while adapting to changing economic, social, and environmental pressures.

This course is part of the activities developed by **the EU-GIFT University Alliance**, the Europe-an University for Geographical Identity as a driver for Food systems Transition to sustainabil-ity, that unites seven Higher Education Institutions (HEIs). The EU-GIFT Alliance focuses on addressing the skills, research, and innovation requirements inherent in the production of foods and beverages bearing a geographical identity within the European Union.

The program consists of a **one-day online event with a preparation task for the students and a five-day in-person event in Logroño**. The course includes both academic lectures and technical visits to food and wine producers in La Rioja. Technical visits are organized with the collaboration of European Centre for Rural Information and Promotion in La Rioja.

VIRTUAL PART 15th JUNE 2026

Mentoring- student work orientations to prepare the description of a local food and wine.
Preparatory task for the students.

Elena González Fandos

University of La Rioja, Spain

Monday 15th June 2026 | Virtual lectures | Synchronous 10:00 - 17:30 h

 Visit to Florentino Winery (Cordovín)
 Visit to Espacio Cáscaras (Pedroso)

Friday 26th June 2026

-
- 9:00 - 10:30 h ● **LECTURE**
 Valorizing by-products in Traditional Food Systems
Cristina Coman | University of Agricultural Sciences and Veterinary Medicine Cluj-Napoca, Romania
 - 10:30 - 12:00 h ● **LECTURE**
 Slow Food Cluj Transylvania - care for consumers and land
Lucian Cuibus | University of Agricultural Sciences and Veterinary Medicine Cluj-Napoca, Romania
 - 12:00 - 13:30 h ● **STUDENTS PRESENTATIONS**
 - 13:30 - 16:00 h ● **TASTING**
 Food and wine tasting
Pedro Balda Manzanos | University of La Rioja, Spain
Elena González Fandos | University of La Rioja, Spain
 - 16:00 - 16:30 h ● **CLOSING SESSION**

ANNEX 1

Blended intensive programmes are short, intensive programmes that use innovative ways of learning and teaching, including the use of online cooperation. The programmes may include challenge based learning where transnational and transdisciplinary teams work together to tackle challenges for example those linked to the United Nations' sustainable development goals or other societal challenges identified by regions, cities or companies. The intensive programme should have added value compared to existing courses or trainings offered by the participating HEIs and can be multiannual. By enabling new and more flexible mobility formats that combine physical mobility with a virtual part, blended intensive programmes aim at reaching all types of students from all backgrounds, study fields and cycles.

Groups of higher education institutions will have the opportunity to organise short blended intensive programmes of learning, teaching and training for students and staff. During these blended intensive programmes, groups of students or staff as learners will undertake a short-term physical mobility abroad combined with a compulsory virtual component facilitating collaborative online learning exchange and teamwork. The virtual component must bring the learners together online to work collectively and simultaneously on specific assignments that are integrated in the blended intensive programme and count towards the overall learning outcomes.

Blended intensive programmes are developed and implemented by at least three higher education institutions (HEIs) coming from at least three EU Member States and third countries associated to the Programme (called a blended intensive programme partnership).
