Programme

This Staff Week is dedicated to entrepreneurship, particularly student entrepreneurship, and also innovation, both being included in the goals of the EU-GIFT Alliance. The Staff Week will tackle the following key question:

- How can universities strengthen knowledge transfer between research, education and business and thus foster the entrepreneurship and the innovation?

The Staff Week will offer presentation of the local stakeholders and the good practices, working and participative sessions. The agenda will include also the visit of the local hubs and sessions with students.

We warmly invite academic and administrative staff members who are already involved in entrepreneurship and innovation activities and those who would like to learn more in this field. The participants will also be invited to bring and share their expertise and good practices.
